

Design Specs

This sight will be a friendly, happy, inviting, lighthearted website advertising horses for sale as well as the "Cloud 9 Walker's Way". This feeling will be accomplished through bright bold Texas colors, a lighthearted tone in all text, lots of images, and very simple navigation. This is the way the sight is currently portrayed. It is apparent that whoever created this sight initially loves horses and wants that love to be easily seen and shared and accessed. This tone is present in the wording and content on the initial sight. I plan to reorganize the website to be more easily navigated. Currently it is just one site you have to scroll forever through with no CSS code. I will create a CSS code and a navigation menu present in the heading and buttons throughout for easier navigation. We will keep the content and lighthearted wording to simply clean up the site and make it more accessible.

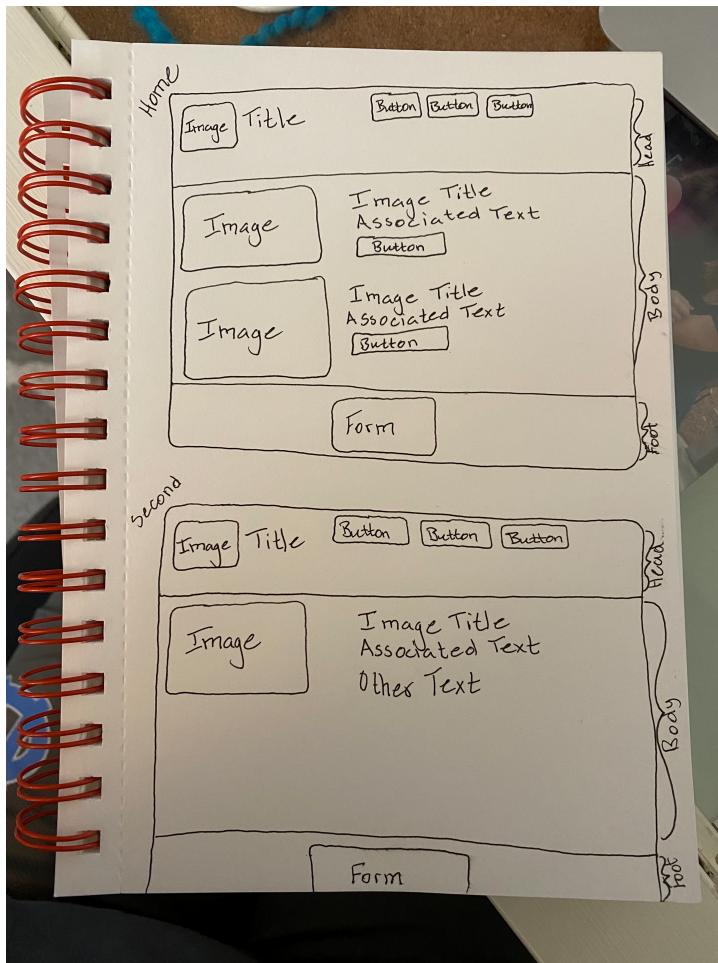

Mobile View

- Navigation menu will move to under title
- Images will bump left
- Image title and text and any associated buttons will move to underneath the images
- Bottom form will recenter itself in the footer
- This applies to the home screen and the secondary page:

Desktop View

- Navigation menu will be on the right side of the screen in the header
- Images will bump right
- Image title and text and any associated buttons will move to a column to the right of the image
- Bottom form will recenter itself in the footer
- This applies to the home screen and the secondary page:

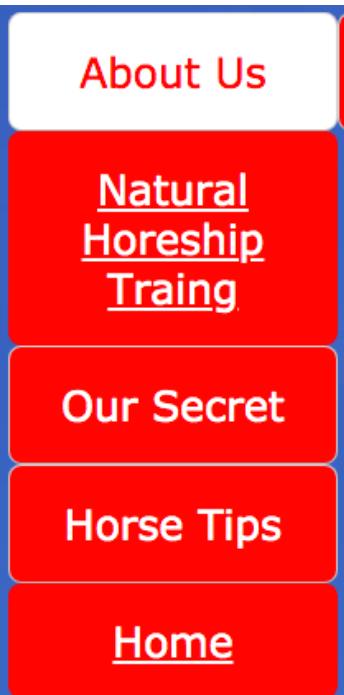

Design Pallet

- Color: Red (255,0,0), White (255,255,255), and Blue (0,0,128) like the Texas flag
- Font: Verdana, Tahoma, Sans-Serif
- Button for Navigation Menu:

- With Mouse over:

- Button in body:

- With Mouse over:

- Menu:

- Form:
